

## WHO WE ARE

We're ProPulse, A Schieffer Company, and we're backed by more than 90 years of innovation. Our German roots run deep, but we've also added some ingenuity of our own. We may not be the biggest company in the market, but we make up for that by customizing product and fulfillment solutions for you—fast.

## GET IN TOUCH

We don't sit around waiting for the phone to ring—we're busy finding ways to get your Power Moving Forward. But give us a call with your unique challenge and we're all ears.

**POWER MOVING FORWARD™**

*Innovating, engineering and manufacturing  
unique solutions for users of hoses and  
fittings for high-pressure fluid conveyance*

## WHO WE SERVE

Ultimately, we serve the end user—your customer —by serving you. We want to make your product superior so your customer has a better experience. Because sometimes industry standards are not enough, we step up to the plate for you with:

- › Customized and innovative products
- › On-time deliveries
- › Quality service
- › Creative inventory solutions, such as kitting, kanban and labelling
- › Cost effectiveness and economy

## WHAT WE DO

We find the weak link and get to work. If your industry uses high pressure hoses for fluid conveyance, we're willing to bet there are areas that could use improvement. Our R&D department just got some major upgrades, and we're itching to push its boundaries by addressing challenges like these:

- › Greater flexibility
- › Enhanced UV, chemical and abrasion resistance
- › Better impulse life
- › Lighter weight
- › Smaller bend radius
- › Lower coefficient of friction
- › Fitting retention
- › Burst pressure beyond the norm
- › Salt spray resistance
- › All under the umbrella or beyond the minimum requirements of SAE or ISO standards

## WHY WE DO IT

We have the right balance of experience and flexibility to make incredible improvements to a wide range of markets—innovating current standards is our strong suit. So far we've gone above and beyond with the following products, and it's a trend we plan to continue:

- › CLEANSTREAM™
- › UberFlex™
- › HyWire™
- › Arm-a-Flex™
- › And more in the works

## OUR SPECIFIC MARKETS INCLUDE:

More niche products are in the development pipeline.

## CREATING PROBLEM-SPECIFIC SOLUTIONS

A pressure cleaning contractor was experiencing hose failures when cleaning Yankee Stadium. The hose cover was wearing away quickly against the abrasive action of concrete stairs. ProPulse engineers developed a special hose using proprietary Arm-a-Flex™ cover technology. Hose assemblies are now lasting longer by a factor of 10, resulting in substantial ongoing cost savings for the contractor.

Another example comes from a major pressure-washer manufacturer whose product management people challenged ProPulse to develop a special, more flexible hose for its lineup. So ProPulse developed UberFlex™—a lightweight, flexible, low-profile, low-tack hose that does not permanently kink and also resolves common consumer complaints about hose handling. Multiple retailers and manufacturers now go so far as to specify ProPulse UberFlex hose on the machines they sell.
